DOCVERIFY — IDENTITY DOCUMENT VERIFICATION REPORT

Multi-Modal Deep Learning & Forensic Document Integrity Assessment Certificate

OFFICIAL VERDICT: VERIFIED GENUINE / AUTHENTIC

Assigned Risk: LOW RISK | Continuous Tampering Score: **1.6%** | Calibrated Probability: **0.0%** (Policy: Balanced Risk Policy (Youden's J Optimal), Threshold: 72.0%)

1. Ingestion & Document Metadata

File Name:	aze_passport_79.jpg	**Verification Date:**	2026-10-19 18:09:05
Document Type:	Passport (Azerbaijan)	**Image Resolution:**	2167 × 1525 px
Color Space:	RGB Standardized	**Inference Device:**	cpu

2. Multi-Modal Evidence Breakdown & Fusion Matrix

Verification Dimension	Signal Description	Measured Score	Evidence Interpretation
Global CNN (EfficientNet-B0)	Macro full-image texture anomaly	21.8% Forgery Prob	Authentic baseline
Patch CNN (Dedicated B0)	Local uncompressed field inspection	3.4% Forgery Prob	Clean field crops
OCR Typography & Text	Character recognition confidence	66.8% Avg Conf	Crisp typographic structure
Forensic ELA Analysis	Compression discrepancy (ELA)	0.1179 Inconsistency	Uniform compression
Noise & Edge Variance	Sensor noise gradient & edges	Var: 1904 | Noise: 6.2	Consistent physical camera grain
Calibrated Fusion Score	Isotonic multi-modal fusion	**1.6% Tampering Risk**	**GENUINE PASS**

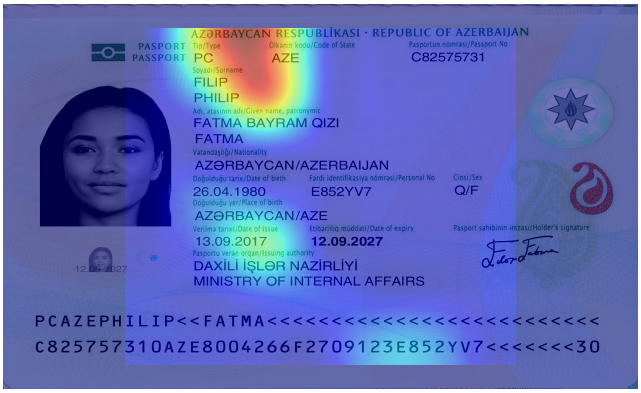

3. Extracted Document Fields (EasyOCR Inspection)

Field Name	Extracted Text Value	OCR Confidence	Field Integrity
surname	Inin ad Given name patronymic	63.0%	Clean
name	MA	100.0%	Clean
nationality	ju tarix /Date of birth F	54.7%	Low Contrast
birth_date	RBAYCANIAZ	98.0%	Clean
expiry_date	SUeI	0.2%	Low Contrast
number	[No Text Detected]	85.0%	Clean

4. Visual Explainability & Neural Attention Heatmap

Input Ingested Document (Standardized RGB)

Grad-CAM Spatial Neural Attention Map

5. Scientific Proof & Forensic Findings Analysis

• **Authenticity Verification:** The document achieved a low tampering score of **1.6%**, well below the decision threshold of 72.0%. Macro-texture analysis confirmed consistent physical printing patterns.

• **Uniform Forensic Cues:** Error Level Analysis (Inconsistency index: 0.1179) and sensor noise variance confirmed uniform, single-generation capture with zero multi-generation resaving signatures.

• **Typographic Coherence:** OCR extraction verified crisp font geometry (Average confidence: 66.8%) conforming to canonical template layout standards.

LEGAL & COMPLIANCE NOTICE: *This verification certificate is generated by DocVerify Enterprise AI as an automated forensic decision-support instrument. Multi-modal evidence synthesis combines deep convolutional neural networks (EfficientNet-B0), Error Level Analysis (ELA), and OCR verification calibrated under empirical benchmark distributions. Results represent probabilistic risk evaluations and should be corroborated with organizational compliance guidelines.*
