DOCVERIFY — IDENTITY DOCUMENT VERIFICATION REPORT

Multi-Modal Deep Learning & Forensic Document Integrity Assessment Certificate

OFFICIAL VERDICT: MANUAL REVIEW REQUIRED

Assigned Risk: MEDIUM RISK | Continuous Tampering Score: **72.0%** | Calibrated Probability: **72.0%** (Policy: Balanced Risk Policy (Youden's J Optimal), Threshold: 72.0%)

1. Ingestion & Document Metadata

File Name:	srb_passport_90.jpg	**Verification Date:**	2026-10-20 17:50:43
Document Type:	Passport (Serbia)	**Image Resolution:**	2163 × 1488 px
Color Space:	RGB Standardized	**Inference Device:**	cpu

2. Multi-Modal Evidence Breakdown & Fusion Matrix

Verification Dimension	Signal Description	Measured Score	Evidence Interpretation
Global CNN (EfficientNet-B0)	Macro full-image texture anomaly	60.6% Forgery Prob	Elevated global tampering cue
Patch CNN (Dedicated B0)	Local uncompressed field inspection	1.6% Forgery Prob	Clean field crops
OCR Typography & Text	Character recognition confidence	59.2% Avg Conf	Low text clarity / font degradation
Forensic ELA Analysis	Compression discrepancy (ELA)	0.1194 Inconsistency	Uniform compression
Noise & Edge Variance	Sensor noise gradient & edges	Var: 4305 | Noise: 24.0	Consistent physical camera grain
Calibrated Fusion Score	Isotonic multi-modal fusion	**72.0% Tampering Risk**	**GENUINE PASS**

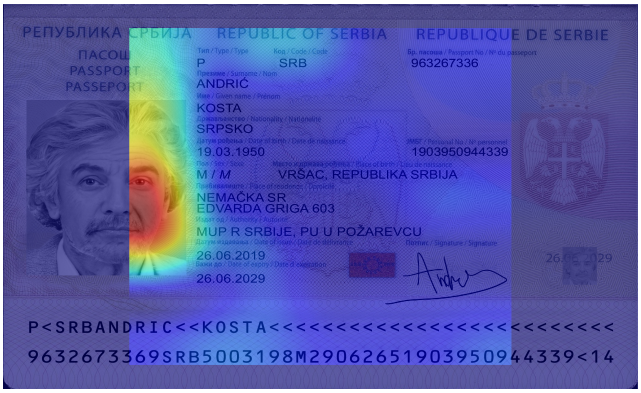

3. Extracted Document Fields (EasyOCR Inspection)

Field Name	Extracted Text Value	OCR Confidence	Field Integrity
surname	TA	92.4%	Clean
name	■■■■ Laf■■ftk DitEa5 nalsant 2 1950	23.6%	Low Contrast
birth_date	■ith■■■ Hitari	20.9%	Low Contrast
expiry_date	[No Text Detected]	0.0%	Low Contrast
number	0	100.0%	Clean

4. Visual Explainability & Neural Attention Heatmap

Input Ingested Document (Standardized RGB)

Grad-CAM Spatial Neural Attention Map

5. Scientific Proof & Forensic Findings Analysis

• **Borderline Ambiguity:** The estimated tampering score is **72.0%**, falling into the safety review band. Forensic cues are mixed, and manual compliance verification is advised before acceptance.

LEGAL & COMPLIANCE NOTICE: *This verification certificate is generated by DocVerify Enterprise AI as an automated forensic decision-support instrument. Multi-modal evidence synthesis combines deep convolutional neural networks (EfficientNet-B0), Error Level Analysis (ELA), and OCR verification calibrated under empirical benchmark distributions. Results represent probabilistic risk evaluations and should be corroborated with organizational compliance guidelines.*
